

# Importance and Benefits of 5G for the Arab Region

Workshop on 5G and its Impact  
15<sup>th</sup> Annual Meeting of AREGNET  
Abu Dhabi, 18 September 2017

Turhan Muluk, Regional Manager  
ITU-D Representative

# LEGAL DISCLAIMERS

Intel technologies' features and benefits depend on system configuration and may require enabled hardware, software or service activation. Learn more at [intel.com](http://intel.com), or from the OEM or retailer. No computer system can be absolutely secure. .

Tests document performance of components on a particular test, in specific systems. Differences in hardware, software, or configuration will affect actual performance. Consult other sources of information to evaluate performance as you consider your purchase. For more complete information about performance and benchmark results, visit <http://www.intel.com/performance>.

Cost reduction scenarios described are intended as examples of how a given Intel-based product, in the specified circumstances and configurations, may affect future costs and provide cost savings. Circumstances will vary. Intel does not guarantee any costs or cost reduction.

# Agenda

- 5G and Intel
- Importance of 5G for Arab Region
- Conclusions and Recommendations

An aerial night view of a city, likely New York City, with a network overlay of white lines and dots connecting various points across the skyline. The text "5G" is prominently displayed in the center.

# 5G

# WHAT IS 5G?

- Next generation of wireless networks
- Provides higher speeds, greater capacity, and lower latency
- Transforms infrastructure to be virtualized and software-defined
- Distributes intelligence throughout the network

# 5G CONNECTED THINGS ARE COMING

# THE INCOMING FLOOD OF DATA

## The rise of connected things and media by 2020

- **212B** sensors
- **50B** devices
- **47%** connections will be machine to machine

## Generating tremendous amounts of data every day in 2020

- Internet users **1.5 GB** per day
- Self-driving cars **4,000 GB** per day
- Connected planes **20,000 GB** per day
- Connected factory **1 Million GB** per day
- Smart Hospitals **3,000 GB** per day

Source: Amalgamation of analyst data and Intel analysis.  
And VNI Global Traffic Forecast. VNI stands for Visual Networking Index.

The Internet of Things delivers insights but new radio and network capabilities are needed for

**SCALE AND SCOPE**

A man wearing a VR headset and holding a controller, standing against a cosmic background with Earth and the Moon. The man is wearing a blue t-shirt under a plaid shirt. He is holding a VR controller in his right hand, which is extended forward. The background shows a large Earth in the upper right, a smaller Moon in the upper left, and a starry space with some nebulae. Thin white lines radiate from the VR headset, suggesting a virtual environment.

**The visual cloud will alter how  
we perceive reality but immersive  
experiences will require**

**MORE BANDWIDTH**

Automated vehicles are  
almost here but ultra  
reliability requires

**ULTRA LOW LATENCY**

**A NEW GENERATION OF  
NETWORKS IS NEEDED**

# 5G UNLEASHES NEW CAPABILITIES

## Services

Social Gaming  
Automotive Entertainment  
3D Video & Hologram Calls  
Enhanced Position-location

## Industrial Applications

Smart Cities  
Energy  
Safety & Security  
Health & Wellness

## Immersive User Experiences

Augmented & Virtual Reality  
Interactive HD TV  
freeD Technology\*  
Context-aware Devices  
Multi-user Telepresence

**ENABLED BY HIGH-SPEED & CAPACITY, LOW-LATENCY CLOUD COMPUTING**

# DIVERSE 5G TECHNOLOGIES WILL FUEL IOT SUCCESS

*Diverse 5G solutions will help grow  
IoT deployments by matching  
requirements to industry use cases*

**LTE ADVANCED PRO**

**NB-IOT**

**802.11AX**

**5G NEW RADIO**

# 5G UNLEASHES THE FULL POTENTIAL OF THE CLOUD

Opens up new  
**business opportunities**  
for operators

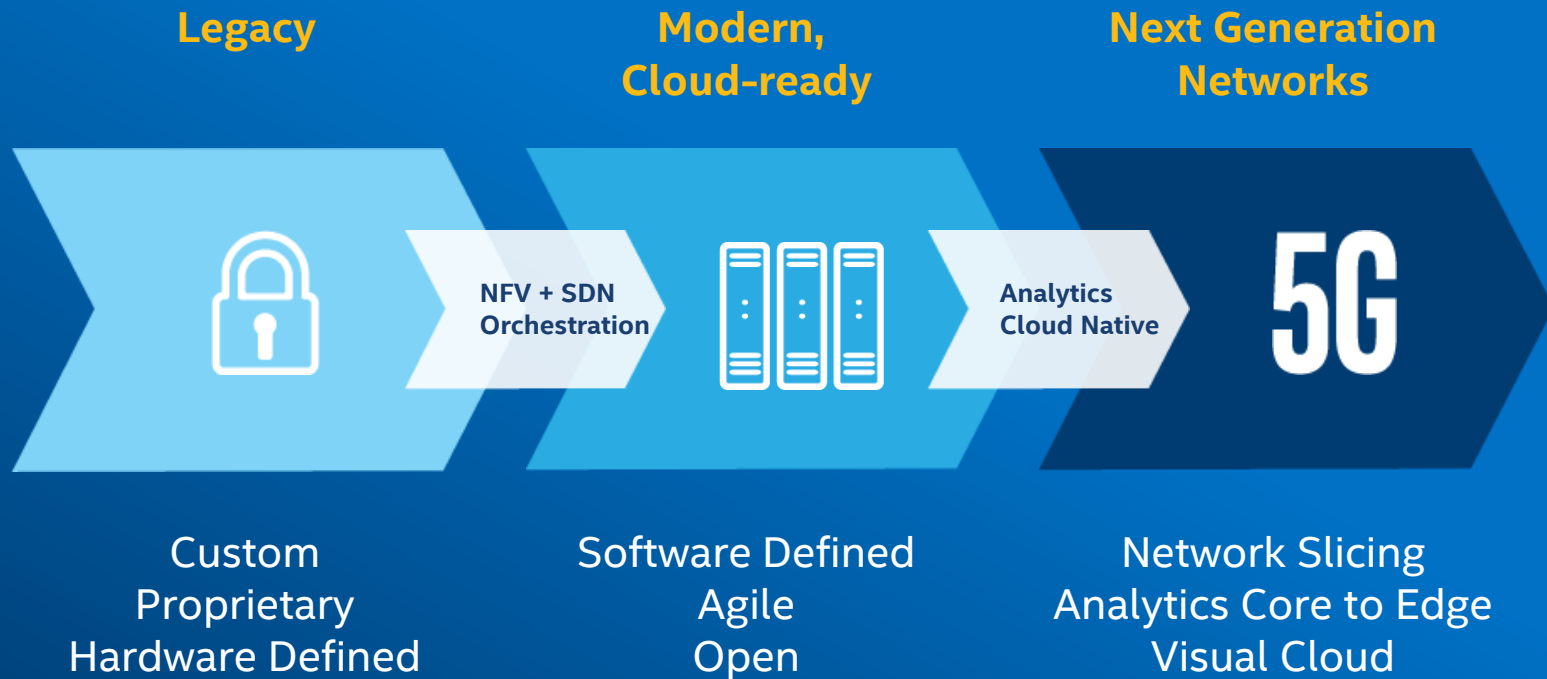

Gives more  
**granular control**  
for workloads  
and usages

Creates whole  
new classes of  
**cloud services**

Enables the cloud  
to deliver **deeper insights** and more  
accurate analysis

# TRANSFORMING THE NETWORK FOR 5G READINESS

# 5G IS A CRITICAL ELEMENT OF THE NEW DATA ECONOMY

Connecting billions of devices will generate a massive wave of data. Only 5G has the scale and scope to enable new **insights**, drive business **efficiencies**, and create data **monetization**.

Autonomous Driving

**1 GB/second**

Smart Hospital

**4000 GB/day**

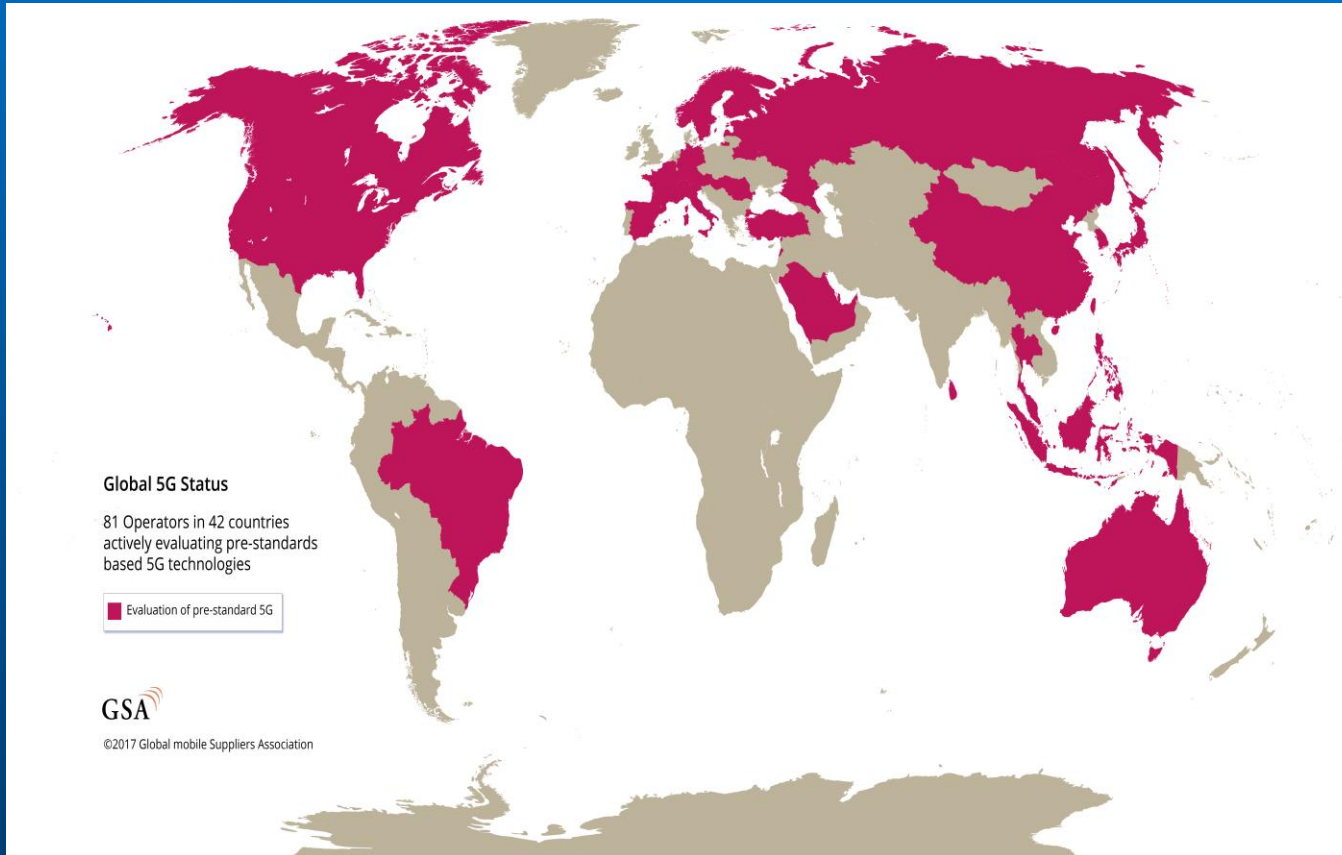

Connected Factory

**1 million GB/day**

# Global 5G Status

(<https://gsacom.com/paper/81-operators-42-countries-evaluating-5g>)

-Over 140 separate demonstrations, tests or trials

-Arab States: Bahrain, Kuwait, Qatar, Saudi Arabia, UAE

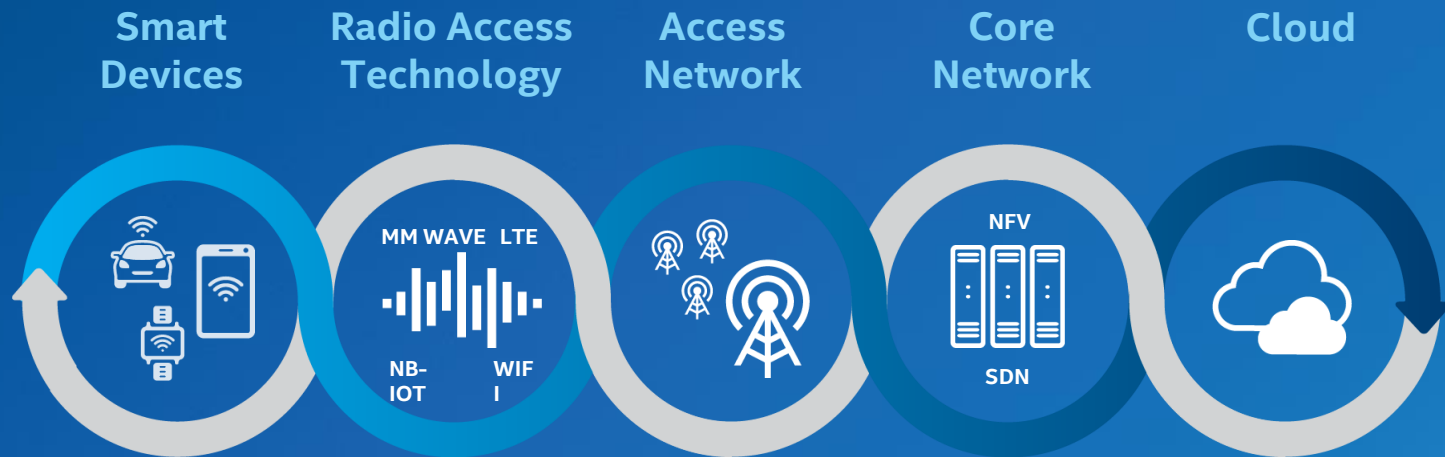

-28 GHz has been the spectrum band most often utilized.”

A nighttime photograph of a city skyline across a body of water. The city is illuminated with warm yellow and white lights, while a prominent building on the right is lit with purple light. A white geometric network of lines is overlaid on the entire image, representing a 5G network. The text "INTEL'S WORK TODAY IN 5G" is centered in the lower half of the image in a large, white, bold, sans-serif font.

# INTEL'S WORK TODAY IN 5G

# BEYOND JUST WIRELESS, 5G INCORPORATES COMPUTING AND CLOUD TECHNOLOGIES TO MAKE EVERYTHING SMART AND CONNECTED

## Intel Powers 5G End-to-End

# Ecosystem Collaboration

# ONE YEAR AGO

## Intel Products

Announced Intel® 5G Mobile Trial Platform & partners

## 5G Standards

- Intel is partnering with operators including NTT DoCoMo, KT, SKT, AT&T and Verizon to drive the development and standardization of 5G.

## 5G Partners

- Intel is accelerating the path to 5G development by working with industry leaders to deliver optimized solutions for both devices and the network, including collaborations with:

# TODAY

## Intel Products

- World's first 5G global modem on both sub-6Ghz bands and mmWave spectrum
- Intel® GO Automotive 5G Connectivity Platform
- 2<sup>nd</sup> and 3<sup>rd</sup> 5G Mobile Trial Platforms

## 5G Trials Around the World

- Global trial, test, and standards engagements with:

## Collaboration

- 5G Network Transformation disclosures: AT&T, Verizon & NEC
- BMW Group, Intel and Mobileye team up to bring fully autonomous driving to streets by 2021
- China Mobile, Ericsson and Intel showcase application of latest cellular IoT technology at MWC Shanghai 2016

# PROMISE OF IOT DELIVERED THROUGH AI AND 5G

*Artificial intelligence will unleash new wave of opportunity*

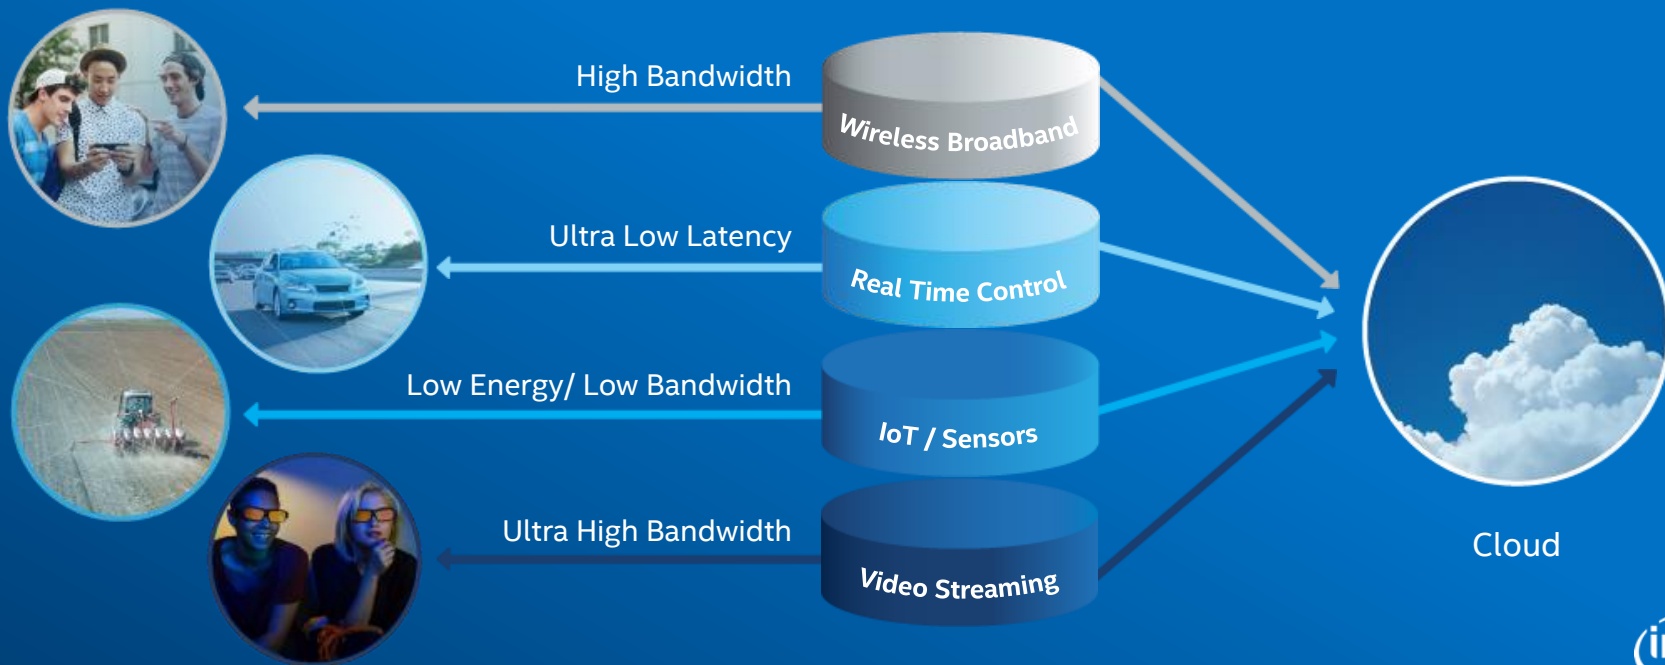

- 5G's **billions** of connected things will require AI and analytics for accurate insights and a path to monetization
- **Intelligence** to power AI will be embedded in devices, the edge, and the cloud
- Intel servers fuel analytics today, and we're investing in future technologies to make AI **ubiquitous**

# MATCHING CLOUD SERVICES TO DIVERSE DELIVERY NEEDS

*Intel technology delivers the diverse processing requirements to power 5G network slicing*

## 5G Network Slices

# PUTTING IT ALL TOGETHER: AUTONOMOUS DRIVING

Cloud

Powerful analytics required to make sense of massive data from moving vehicles

Core Network

Network will isolate vehicle data in a 'slice' separating it from other types of data

Access Network

Cloud computing at the mobile edge lowering latency

Wireless Technology

5G radios integrate 'vehicle to vehicle' and 'vehicle to everything' connectivity

Smart Devices

Vehicles will have intelligence to manage internal systems and connect to cloud

A nighttime photograph of a city skyline with numerous illuminated high-rise buildings. The city is reflected in a body of water in the foreground. A white geometric network of lines, resembling a 5G signal or data network, is overlaid on the entire image. The text "IMPORTANCE OF 5G FOR ARAB REGION" is written in large, bold, white capital letters across the lower half of the image.

# IMPORTANCE OF 5G FOR ARAB REGION

# 5G - Transformation into a Knowledge-based Economy

- Saudi Arabia: Vision 2030
- UAE: Vision 2021
- Egypt: Vision 2030
- Qatar: Vision 2030
- Algeria: Vision 2035
- Jordan: Vision 2025

# 5G BRINGS OPPORTUNITY TO ARAB REGION

# Important 5G Vertical Industries for Arab Region

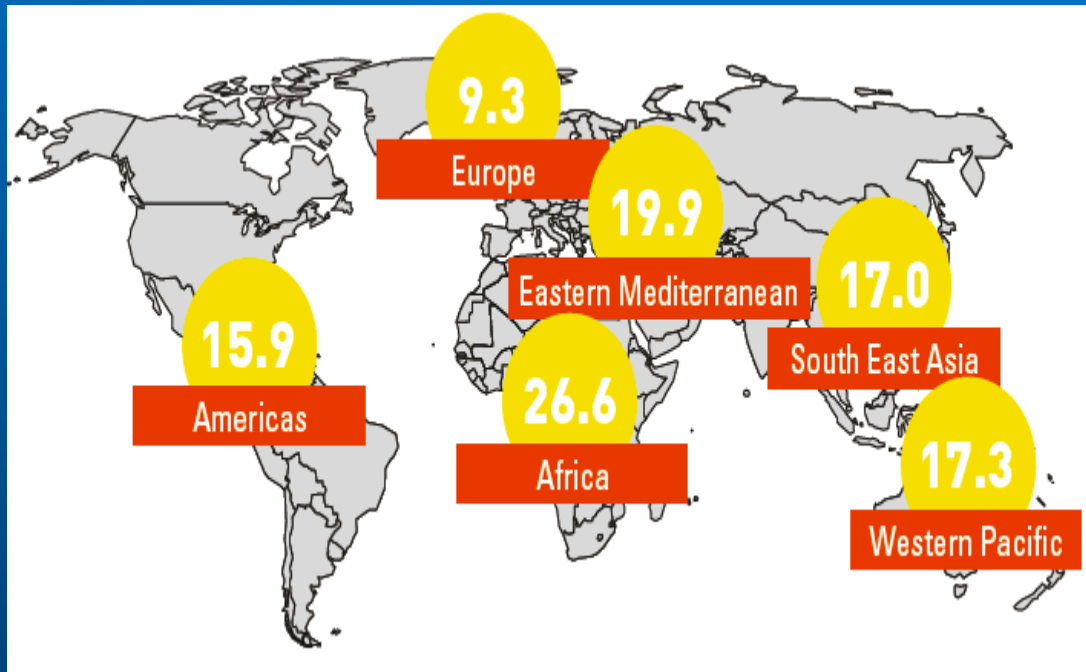

- **Smart Transportation Systems:** According to WHO, 90% of the world's fatalities on the roads occur in low- and middle-income countries, even though these countries have approximately half of the world's vehicles.
- **e-health:** Remote surgery will reduce the latency to enable remotely assisted surgery. Specialists are not available in many hospitals and could join a local surgeon remotely to perform procedures which require expert skills (5G's latency will be around one millisecond -unperceivable to a human and about 50 times faster than 4G).
- **Smart Learning:** 5G will enter the classroom and bring new ways of learning to students. Augmented Reality, Virtual Reality and Virtual Presence will mean that students will be immersed in a more visual and interactive learning experience where students and teachers may not necessarily be in the same location.
- **Water Management and Agriculture:** 5G will also bring a solution for smart water management and smart agriculture systems in developing countries. Such as sensors with wireless connectivity for crop fields can help optimize growing and minimize use of water and fertilizers through more targeted application.
- **Oil and Gas Industry:** Analytics to survey land , optimizing well and field work, equipment maintenance and remote performance .
- **And others.**

# 5G Vertical Industry

Vertical industry	Example use cases and applications	Partners
Healthcare	Connected Care, Precision Medicine, Imaging and Diagnostics, Genomics/Big Data, Remote Surgery	Medical Device Manufacturers, Insurers (public or private), Researchers, Ministries of Health
Automotive	Engine alert and automatic maintenance scheduling, autonomous driving, collision avoidance, V2V	OEM's, Researchers, Ministries of Transportation
Public Safety	Enhanced Incident/disaster alert and response, real time traffic management	Venues (i.e. stadiums, etc.), municipalities and governments, infrastructure vendors, operators, OEMs, etc.
Sustainability/ Environmental	Adaptive air sensors, water management systems, energy	Researchers, Government Parks services, Agriculture
Education	wireless real-time interactions, virtual and augmented reality interactions without visual delay	School Districts, OEM's, Ministries of Education, Regulators, Researchers
Smart City	Remote monitoring of roads and city infrastructure, smart meters/parking	Service Providers, Universities, Local Municipalities, Federal Policy Makers, Utilities, etc.
Public Transportation	Flexible/adaptive bus/fleet management, Allowing more efficient routes	Transit Systems, Operators, Municipal Governments, Researchers, etc.
Wearables	Fully connected devices (no need for a smartphone tether), tagged devices to assist with inventory management	OEM's
Smart Homes	Remote security monitoring and controls (i.e. locks, hi res camera surveillance, etc.)	Infrastructure Vendors, Heating and Cooling Systems, Cable Companies, etc.
Smart Grid	Smart 'end to end' power distribution networks with predictive analytics	See Smart City
Industrial	Sensors with wireless connectivity for crop fields can help optimize growing and minimize use of water and fertilizers through more targeted application.	Farmers/Agriculture, Ministries of Agriculture, etc.

# Road Traffic Deaths per 100.000 Population (WHO)

1.25 million road traffic deaths occur every year in the world.

Traffic accidents in 2016 killed 9,031 people, in Saudi Arabia, with an average of over 25 deaths a day and one death an hour

Egypt loses about 12 000 lives due to road traffic crashes every year. Road Accidents Cost to Egypt EGP 30.5 Billion in 2015 (1.73 Billion US Dollar). Source: CAPMAS- Central Agency for Public Mobilization and Statistics)

# 5G/IoT for The Oil and Gas Industry

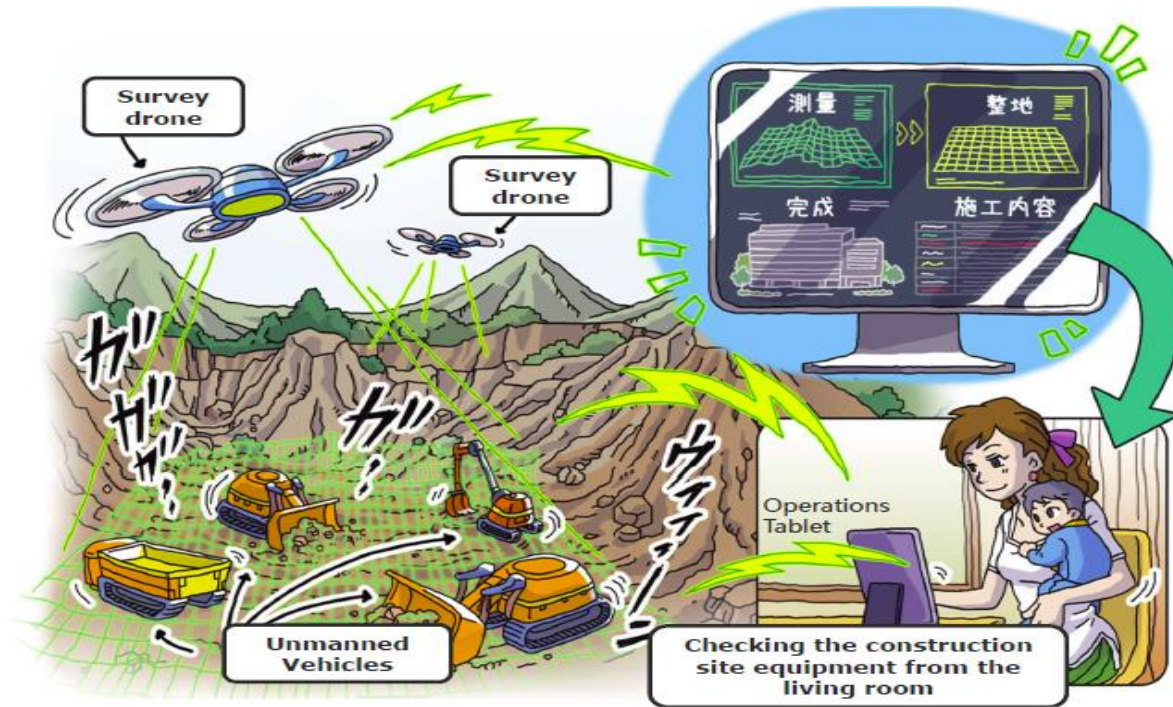

- Analytics to survey land for new potential drilling sites and extract the oil from the ground
- Internet-connected sensors used to provide environmental metrics about extraction sites.
- By fully optimizing the IoT solutions an oil and gas company with \$50 billion in annual revenue could increase its profits by nearly \$1 billion.
- **Optimizing well and field work:** Gathering and organizing data has never been more important. By some estimates, internal data generated by large integrated oil and gas companies now exceeds 1.5 terabytes a day.
- Equipment maintenance, remote performance monitoring, predicting production.

# Changes in Rural Life

# Changing the Way We Do Work

# Changes in Town

# 5G Hologram

KT and Verizon held the world's first live hologram international call.

# How 5G will contribute to the economy?

- According to IHS report In 2035, 5G will enable \$12.3 trillion of global economic output. That is nearly equivalent to US consumer spending in 2016 and more than the combined spending by consumers in China, Japan, Germany, the United Kingdom and France in 2016 <https://www.ihs.com/Info/0117/5g-technology-global-economy.html>
- The global 5G value chain will generate \$3.5 trillion in output and support 22 million jobs in 2035. This figure is larger than the value of today's entire mobile value chain
- **Arab States should be able to get maximum benefit from this opportunity without any delay.**

# CONCLUSIONS AND RECOMMENDATIONS

# 5G Plans

- **European Union: 5G Action Plan:** [http://ec.europa.eu/newsroom/dae/document.cfm?doc\\_id=17131](http://ec.europa.eu/newsroom/dae/document.cfm?doc_id=17131)
  - Timely deployment of 5G: a strategic opportunity for Europe
  - The need for a coordinated approach
  - A common EU timetable for the introduction of 5G:
    - i) Member States to develop, by end 2017, national 5G deployment roadmaps as part of the national broadband plans
    - ii) Every Member State will identify at least one major city to be "5Genabled" by the end of 2020 and that all urban areas and major terrestrial transport paths have uninterrupted 5G coverage by 2025.
- **Germany: 5G-Strategy**  
(<https://www.bmvi.de/SharedDocs/DE/Publikationen/DG/098-dobrindt-5g-strategie.html?nn=12830>)
- **Turkey: 5GTR Forum**
- **UAE: National 5G Committee**
- **UK: 5G Strategy:**  
([https://www.gov.uk/government/uploads/system/uploads/attachment\\_data/file/597421/07.03.17\\_5G\\_strategy\\_-\\_for\\_publication.pdf](https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/597421/07.03.17_5G_strategy_-_for_publication.pdf))
- **South Korea:** Creative 5G Mobile Strategy and 5GForum (<https://www.5gforum.org>)
- **Japan:** 5G Development Roadmap toward 2020 (<http://5gmf.jp/en>)

# Spectrum Needs of 5G

Success requires sufficient spectrum in a variety of bands with economies of scale

## 5G applications drive technical requirements, including type and amount of spectrum

< 1 GHz – for wide area applications, e.g. sensor networks, etc.

< 6 GHz – for coverage/capacity trade-off, e.g. massive MIMO, outdoor-to-indoor

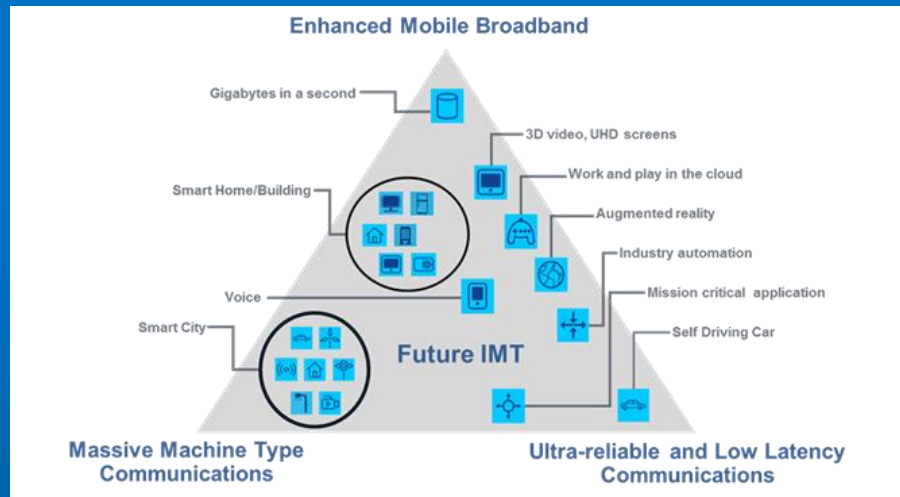

Higher MM Wave – for apps needing ultra-wide channels, e.g. 4k/8k video, VR, etc.

## Continuous flow of sufficient, adequate, new spectrum is key to:

Expansion of wireless market to 5G and beyond

Building a strong and healthy eco-system

## IMT for 2020 and Beyond

# Harmonization

Harmonization crucial to enable:

- Global roaming
- Economies of scale
- Harmonization of radio tuning ranges, rather than exact bands

# Recommendations

- Develop Regional and National 5G Plans to accelerate the 5G and vertical applications.
  - Support to prioritize 5G for the next four year at WTDC-2017 and consider a regional 5G initiative.
  - Launch a 5G network at least in one major city by 2020.
  - Transform existing ICT networks according to 5G need (Smart City, smart government networks and networks of operators).
- 
- Allocate sufficient low-band, mid-band and high-band spectrum for mobile broadband in collaboration with industry (consider to benefit from the harmonization of 26+28 GHz tuning range, 26 GHz: 24.5-27.5 GHz and 28 GHz: 26.5-29.5GHz)
  - Adopt policies/regulations to accelerate the 5G such as small cells and backhuls for 5G (71-76 GHz/81-86 GHz)
  - Allocate unlicensed spectrum at 66-71 GHz (this is important as an extension band for Wireless Gigabit Networks as defined in the ITU).

**THANK YOU**
